

CABLE MANAGEMENT PANEL

Product Appearance

Description

The Cable Management Panel is designed as a 1U size for use in a 19-inch rack environment for managing Patchcords that are connected between Patchpanels or Hubs. The product is mounted via screws and is generally placed between each Patchpanel / Hub.

The base is metal with a clip on cover that is easily removed to locate Patchcords. The fingers allow space for the cord to locate prior to replacing the cover.

Product Features and Benefits

- * 19" rack mounted front and rear 1U metal panel
- * Accommodates up to 48, 4 pair UTP/FTP/STP Patchcords
- * Cover gives good rack aesthetics
- * Great improvement on day to day moves and changes
- * Latch on cover protects Patchcords from damage
- * 12 slots allow routing of Patchcords to upper and lower sides
